Huge congratulations to the teams at CaMLSys and BUPT -- particularly Zhenyan Lu, Dongqi Cai, [Zexi Li](#) and all the collaborators -- for winning the Best Poster Award at MobiUK 2025 in Edinburgh! 🏆

The work, "Resource-Efficient Knowledge Editing for Mobile LLMs," tackles critical challenges in enabling adaptable and highly efficient large language models on mobile and edge devices. This paves the way for more personalized, sustainable, and energy-efficient AI applications. ✨

Resource-Efficient Knowledge Editing for Mobile LLMs -
